

ALEX S. ROHLER

ZEND CERTIFIED PHP ENGINEER - ZEND029184

From Santa Maria, Rio Grande do Sul, Brazil. Contact me by e-mail in alexrohleder96@outlook.com, see my contributions and projects on <https://github.com/alexrohleder96> or get more info about me at <https://linkedin.com/in/alexrohleder>.

Introduction

Why to apply for this job?

I am a 20 years old Brazilian that dreams to become a great developer, recognized in my actuation area and with a big experience. One of my ambitions is to work in another country, with another habits, language and people, and then start building an international career expanding my own culture and life history.

Experience

Mid-Level PHP Developer at [Grupo Meta](#)

March 2016 – Present

Use **Laravel 5.1** in several projects for a big client on the market of health in a national scope, build a webservice based on **REST** principles using **Lumen**. Apply several **design patterns** for a better, **reusable and maintainable software**.

Our front-end development are based components using **VueJS**. We use, build and contribute with existing components from the community and write code in **ES6**, using **babel** in **elixir**, as well as **SASS** to build a unified **CSS** with SCSS files of **Bootstrap** and another libraries.

Intern PHP Developer at [Hospital Universitário de Santa Maria](#)

January 2015 – August 2015 (8 months)

Implemented a software that help doctors and some contributors of the hospital to manage their process. Using **SVN** and **REDMINE** to versioning the **Laravel 4** project, and configuring a **Linux** based homologation and production environment. Worked in a variation of **SCRUM** methodology with a small team and a more bureaucratic system of development.

Competences

Technical

- **PHP** – Four years of experience, an international certification and several open source project. I am able to use any kind of package in this programming language;
- **JavaScript** – Four years of experience as well, some open source contributions, daily contact and study. Now writing code in ES6 and working in isolated components;
- **CSS** – Four years of experience, currently writing code in SASS, experience building from packages source, like from bootstrap scss files. Able to use CSS3 capabilities.
- **SQL** – Four years of experience, know how to structure, query and script using PL/SQL. Experience with big enterprises oracle databases, and able to optimize querying time.

Personality

- **Responsible** – “Act like business owner”, my actions and motivations are the same of my company. I believe that grow along with the company is the best way to achieve career success.
- **Fast** – I need to be fast, but without losing the excellence in every commit. This is the market standard and I have the ability to focus in a task and work hard on that every single time.
- **Cooperative** – In my experience, I need to be there for my coworkers, help and act like a team leader. I have a good relationship with people and I have worked in teams with more than 20 people, in a company with more than a thousand of employees.

OpenSource Projects

PHP libraries focused on software performance

- IoC (<https://github.com/codeburnerframework/container>)
- Router (<https://github.com/codeburnerframework/router>)
- Annotation (<https://github.com/codeburnerframework/annotator>)

Notes

Some technical things I used and you may be interested

Angular 1.x	React	Redis	Memcached
Oracle SQL Server	PL/SQL	Nginx & Apache	NodeJS & NPM
Gulp & Grunt	Elixir	Bower	Laravel 4 & Laravel 5
Varnish	jQuery	Moment	Lodash
REST	SOAP	Vagrant	GitLab
SASS	Redmine	VueJS	SCRUM
